Velvet Textile Takes Softball Title

Velvet Textile from Blackstone had to go eight innings to beat Lawson Ford in the championship game and claim the title in the A.C.H.S. Athletic Booster's Club slow pitch softball tournament held last week end.

The winners did not lose a game in the double elimination tournament although they had good competition and adeverse playing conditions on Saturday.

The weather was a factor Saturday as several thunderstorms passed over the park as play continued, however the 9 p.m. game was rained out and play was scheduled to resume Sunday morning rather than afternoon. Much credit was given to the ground crew led by Rabbitt Cawthorne (who was also official scorekeeper) for keeping the field playable. Players and coaches also had words ot praise for the officials of the tournament and booster club members who organized and ran the event.

Lawson Ford claimed the second spot losing only to Velvet Textile who beat the runners-up twice during the long week end. Finishing third was the Bank of Phenix team who had the misfortune of having to play three consecutive games on Sunday. They were in the losers bracket and fighting back until they dropped that third game Sunday to Lawson Ford. Best Furniture Co. took fourth place trophy.

The tournament considered of 30 ball games beginning at 7 p.m. Friday and ending at 11:05 P.M. Sunday. "When my alarm clock went off at 6:00 A.M. Monday, I thought a bomb had hit my bedroom", commented Buster Jackson, Booster Club President. Most of the other members who helped were equally as tired, but they were pleased with the results and considered their efforts worthwhile. Fans, which numbered close to 500 at times, wandered in and out of the park enjoyed the fun, won numerous prizes donated by Appomattox County merchants and consumed some 70 gallons of brunswick stew along with other assorted concession items.

Proceeds from the rally will be used by the Booster's Club to help the A.C.H.S. Athletic Program.

Basketball Program Starts July 9th

The Recreational Basketball Program will start Monday, July 9th, and will continue for two weeks.

Students ages 8, 9, and 10 will participate from 9:00 a.m. to 10:30 a.m. Students ages 11, 12, and 13 will participate from 10:30 a.m. to 12 noon. Students ages 14 to 18 will participate from 1 p.m. to 3 p.m.

The program will be held at Appomattox County High School in the gym.

There is no charge for this program.

FHA Federation Meets

Officers of the Campbell-Appomattox Federation, Future Homemakers of America met at Appomattox County High School on Wednesday, June 27, 1979. Attending the meeting were members of the Executive Council of the Federation, representatives of each chapter and advisors for the chapters.

The purpose of the meeting was to plan the program of work for the federation for the 1979-80 school year.

Shown in picture above are, seated from left, Cheryl Walton, president; ACHS; Leslie Ferguson, treasurer, Altavista High School; Marie Keenan, vice-president, Rustburg High School; and standing from left, are Sheila Maddox, reporter/historian, Brookville High School; Susan Goggins, representative from Appomattox Middle School; Michelle Hamlett, representing William Campbell High School.

Update On Removal 'Of Spots And Stains

By K. Lonnette Marsh
Extension Agent

In reference to the article "Removal of Spots and Stains" published in the Times Virginian the week of April 27, 1979, there was an error in recommending the use of carbon tetrachloride and oxalic acid for removal of spots and stains.

I reviewed my resource and found that it was published prior to the banning of carbon tetrachloride and oxalic acid for household use. Therefore, it is recommended to use suggested amounts of household ammonia, not ammonia with added color or fragrances, and white vinegar for removing certain spots and stains in clothing. CAUTION: (Household Ammonia) - Observe all precautions on the label.

If additional information is needed, please call us or we have publications available, **Removing Stains from Fabrics**, USDA Bulletin No. 62, and **Removing Stains from Fabrics**, VPI & SU, MH M 68.

YWCA to Offer Gymnastics Classes

Lynchburg YWCA will offer gymnastic classes beginning July 10 for 5 weeks at the Appomattox Middle School. How Sweet It Is To Be Independent

The Crusaders returned to Europe in the eighth century with a substance that took almost a thousand years to become popular: sugar.

But sugar cane only grows in warm climates, so it remained a luxury even for the wealthy.

Once people discovered beet sugar (and beets could be grown throughout Europe), many countries rushed to grow it. Sugar beets ended their dependence on imported sugar cane, France, for instance, had already had the bitter experience of having

her sugar supply cut off by a wartime blockade.

Today, America grows both beet and cane sugar. Yet, concerned legislators point out, foreign surplus sugar now being dumped on our markets is endangering our own sugar industry. If it is allowed to continue, we, too, might become dependent on foreign sugar.

If this happened, a "sugar OPEC" could play havoc with our supply...as the OPEC countries have with our oil. And that would leave a very sour taste in our mouths!

ENERGY. We can't afford to waste it.

Three ways you can slow it down this summer.

Summer, when all the air conditioners are humming, is the time when our customers use more power than at any other time of year. To meet the demand this summer, you can be sure that we'll be doing everything we can to provide you with all the power you need. We'll be using our available units to capacity, and if necessary, we'll be buying power from our neighboring utilities.

If you pitch in by following the steps below, you can help us make it through the summer.

1. Don't overcool your home. Set your home air conditioner's thermostat at 78° or higher, or not more than 15° cooler than the temperature outside, whichever is the higher setting.

For every degree cooler than 78°, your air conditioner uses about 5% more energy. So a 73° setting means you're using 25% more energy than you would at a 78° setting.

By watching your thermostat, you'll save energy at a time when it's most important.

And you'll save money, too.

2. Do the big jobs early. Or late. We call it Hot Watch. The hours between 10 A.M. and 10 P.M. are the "peak load" hours, when the most electricity is being used and the chance of shortages is greatest.

So try to restrict your use of major appliances and hot water during these hours.

Do your baking and laundry before 10 A.M. Turn on the dishwasher just before you go to bed. Shower before 10 A.M. or after 10 P.M.

You won't be using less energy, but you'll be using it when we have power to spare. And that will reduce our need to build costly power plants.

3. Give your water heater a rest. It will save money and energy. With the exception of heating and cooling systems, the water heater is the biggest energy user in your home. So try your best to work it less.

Use your dishwasher and washing machine only for full loads. Wash clothes in cool or warm water instead of hot. Take showers instead of baths, and keep them short.

With your help we can save energy and make it through the summer. And that's important to all of us.
